

Equipment

Are you looking for a tool to manage your equipment with information and documentation gathered in one place?

With the Microbizz Equipment module, you have all equipment registered in one place with the possibility to add relevant information, e.g., equipment description, quality guidelines, documents, service information and much more.

This means you can plan equipment for your tasks and thereby ensure that the right equipment is being used. Details on the equipment will be available to the employees, also in the Microbizz app.

Working with Equipment Service?

Equipment service tasks are normally a mixture of ad hoc and repeated tasks including preventive maintenance tasks, planned and executed according to agreed service intervals. This you can handle with Microbizz. Tasks and documents are linked to the equipment, to ensure the right task planning and execution. Task information is available for the service technicians on site, including relevant check lists and quality forms.

You can ensure that statutory inspections are complied with and quality forms and certificates are available in the right version – accessible as real time data from any device 24/7.

Equipment overview

- Find equipment/easy search options
- Location of equipment (GPS)
- Equipment in use and by whom
- Capacity utilization
- Cost on equipment

Equipment for tasks

- Use the right equipment for tasks
- Find all relevant information about the equipment, also via the app

Service on equipment

- Ad hoc and repeated tasks including preventive maintenance, handling of service intervals etc.

Quality and certificates

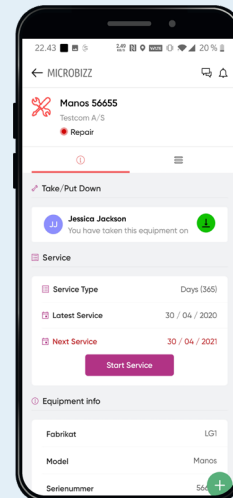

- Quality forms are connected to the equipment
- Filled in forms can generate certificates (PDF)
- Certificates will be linked to the equipment

Equipment

Equipment is registered in Microbizz with all relevant information and files attached

Equipment information is available via the app

Benefits

Less administration

No paperwork, no excel files – but 100% digitized workflows securing information and real time data for all relevant parties.

Save costs

Huge potential for cost savings due to less administration, optimized equipment maintenance and increased productivity.

Secure compliance

Ensure service tasks are fulfilled, statutory inspections are completed within deadlines, and documents/certificates are available as real time data.

Increase productivity

Better planning and less paperwork will increase your productivity.
