Forms

MICROBIZZ

## Are you looking for an easy way to handle quality and process tasks?

With the Microbizz forms functionality, you get a tool to use for a wide range of different tasks and processes. It could be quality forms and forms to register deviations. It could be any kind of questionnaire or template for creating customers or tasks. And not least, forms can be used to generate actions and PDFs and to process tasks.
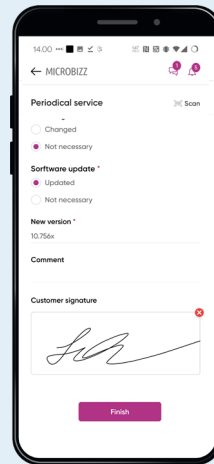

Forms are a key element in Microbizz. You can build your own indifinite number of forms for any purpose. By using forms, you make it much easier for your app users to fill in information, minimizing the need for typing. Also, a uniform data collection based on predefined fields significantly increase the quality of your reports and statistics.

Forms can be used for

- Deviations
- Quality check
- Inspections
- Questionnaires
- Process steps

Forms can generate

- CRM objects, i.e. new customers
- Follow-up tasks, i.e. if deviations
- Tasks and actions
- PDFs – certificates, quality forms etc

Forms

MICROBIZZ

Forms can be created to generate actions, PDFs and certificates

Possible to add signature

Create PDFs based on forms

Optimal user experience
Forms make it easy and convenient for the users to register information, with a minimal need for typing.

Less errors
By using forms with predefined fields, you minimize the risk of errors.

Quality and compliance
You can secure quality and compliance by connecting forms to tasks and/or equipment.

Increased productivity
Using forms will streamline your task and quality workflow by saving time in the task execution as well as the follow up process with a positive impact on productivity.

Reporting and transparency
A uniform data collection based on predefined fields makes it easy and simple to create reports and statistics.
